

The disclosure of this information is required under Section16-127 of the Electric Service Customer Choice and Rate Relief Law of 1997 and the rules of the Illinois Commerce Commission, 83 Ill. Adm. Code-421.

| Sources of Electricity Supplied for the 12 months ending 06/30/25 | Percentage of Total |
|-------------------------------------------------------------------|---------------------|
| Biomass                                                           | 0%                  |
| Coal                                                              | 28%                 |
| Natural gas                                                       | 36%                 |
| Hydro                                                             | 2%                  |
| Nuclear                                                           | 15%                 |
| Oil                                                               | 0%                  |
| Solar                                                             | 4%                  |
| Wind                                                              | 15%                 |
| Other resources                                                   | 0%                  |
| Unknown resources purchased from other                            | 0%                  |
| <b>TOTAL</b>                                                      | <b>100%</b>         |

| <p><b>AVERAGE AMOUNTS OF EMISSIONS</b></p> <p><b>per MWh PRODUCED from KNOWN SOURCES</b></p> <p><b>for the 12 months ending 06/30/2025</b></p> |        |
|------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Carbon Dioxide                                                                                                                                 | 496 kg |
| Nitrogen Oxides                                                                                                                                | 398 g  |
| Sulfur Dioxide                                                                                                                                 | 361 g  |

We bought 100% of the electricity you were supplied from other generators. Data sourced from EIA on an annual basis. Numbers may not equal 100 due to rounding, and some sources are rounded down to 0%. Emissions: Carbon dioxide is a greenhouse gas that contributes to climate change. Nitrogen oxides (NOx) contribute to ground-level ozone, or "smog," and sulfur dioxide and NOx contribute to acid rain. The amount of nuclear waste attributable to producing this electricity is not known and is not included in the above table. Additional information on companies selling electrical power in Illinois may be found at the Illinois Commerce Commission's World Wide Web site ([www.icc.state.il.us](http://www.icc.state.il.us)).
