We bought 100% of the electricity you were supplied from other generators. Data sourced from EIA on an annual basis. Numbers may not equal 100 due to rounding, and some sources are rounded down to 0%. Emissions: Carbon dioxide is a greenhouse gas that contributes to climate change. Nitrogen oxides (NOx) contribute to ground-level ozone, or "smog," and sulfur dioxide and NOx contribute to acid rain. The amount of nuclear waste attributable to producing this electricity is not known and is not included in the above table.
